AIM Conference 2019

Greetings from the Chairman

Welcome to First Jurisdiction Illinois Auxiliaries in Ministry conference 2019. On behalf of our entire AIM family, we hope that you will be informed, intrigued and inspired by what you will witness and experience for the next four nights. It is our goal that you will be blessed in a tremendous way.

The theme for this year's conference is **"Unlimited Accomplishments through God's Unlimited Power"**. In Phil 4:13 the Apostle Paul writes *"I can do All Things Through Christ who Strengthens me"*. God's word is loaded with scripture that admonishes believers to do more, go beyond and achieve that which has never been achieved before. In fact, throughout the bible God often chooses ordinary people to do extraordinary things. We serve a God who is always forward thinking and progressive, whose thoughts and plans are revolutionary and on the cutting edge. There are many things that God can and will do by Himself, but he often desires to partner these accomplishments through His people. Our prayer is that God will use us to do unlimited and extraordinary accomplishments for His ultimate glory!

First Jurisdiction Illinois has some of the finest and passionate auxiliary leaders that you will find anywhere. These leaders will be working together to present a powerful, informational and inspirational conference that promises to positively impact your passion for ministry.

We wish to thank Bishop Ocie Booker for allowing us to serve in our respective positions in the AIM family. He is a leader among leaders, and we applaud his courage, character and charisma as he leads us into higher heights and deeper depths in ministry. We wish to also thank our dynamic Supervisor of Women, Mother Shirley Hughes who we love dearly, for her enthusiastic personality that constantly keeps us motivated. We also wish to thank each superintendent, pastor, elder, minister, missionary, auxiliary worker, delegate, well wisher and friend for your presence and support.

God Bless,

Chairman Richardson
